Work Experience

Technical Support Specialist

Buwelo Company | October 2024 – January 20, 2026

- Provided technical support and troubleshooting for US-based attorneys and law firms under a CARET Tier 3 support environment.
- Supported Abacus Private Cloud (APC) and Amicus Attorney platforms.
- Performed remote desktop setup, cloud application maintenance, and user account configuration.
- Delivered customer support via Zendesk and GoToAssist.
- Maintained technical documentation and knowledge base records.

Intern – Web / Frontend Developer

Pilipinas Micro-Matrix Technology (PMT Joint Venture) Inc. |
February 2024 – April 2024

- Developed responsive web interfaces using HTML, CSS, JavaScript, and Laravel framework.
- Assisted in backend logic implementation and database-related tasks.

Education

Bachelor of Science in Computer Science Gordon College, 2025

Throughout my 4-year academic journey, I developed a strong foundation in software engineering principles, object-oriented programming, algorithms, and data structures.

I worked on multiple academic and personal projects involving full-stack web development, database management, and system design. These projects enhanced my ability to design scalable applications, write clean and maintainable code, and solve complex technical problems efficiently.

In addition, I gained hands-on experience with **modern web technologies**, **cloud-based environments**, and **virtualization concepts**, preparing me to work in real-world development and IT infrastructure settings.
